

Science Graphs

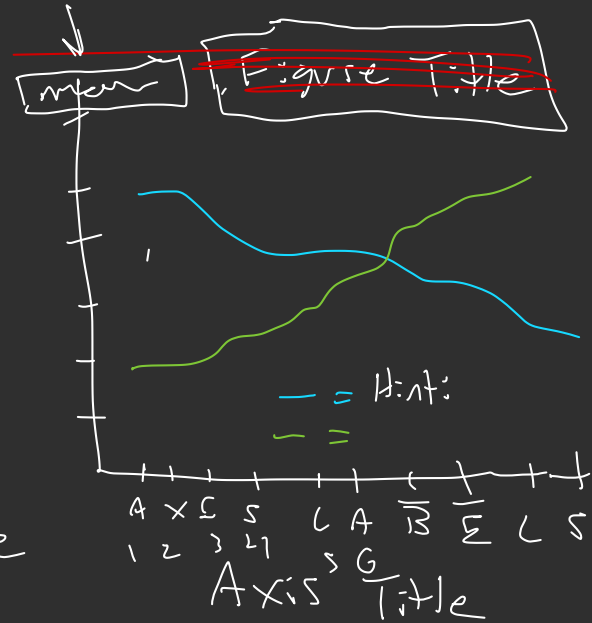

Elements we need

1. Axis titles w/units

2. Axis Labels 4. Legend,
if applicable

3. Caption → Summary or description. Below graph

(Figure captions)
Table captions above

- Counts (discrete)

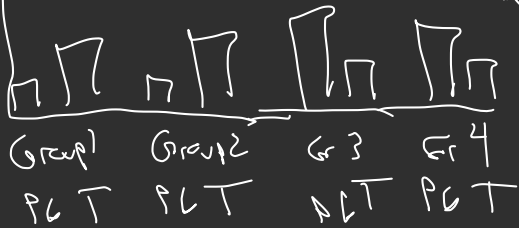

- Binary

1. Which variable goes *continuous*

where? measurement

y-axis = Dependent (Response) variable

x-axis = Independent (Predictor) variable

Data on the

Graph

Error Bars

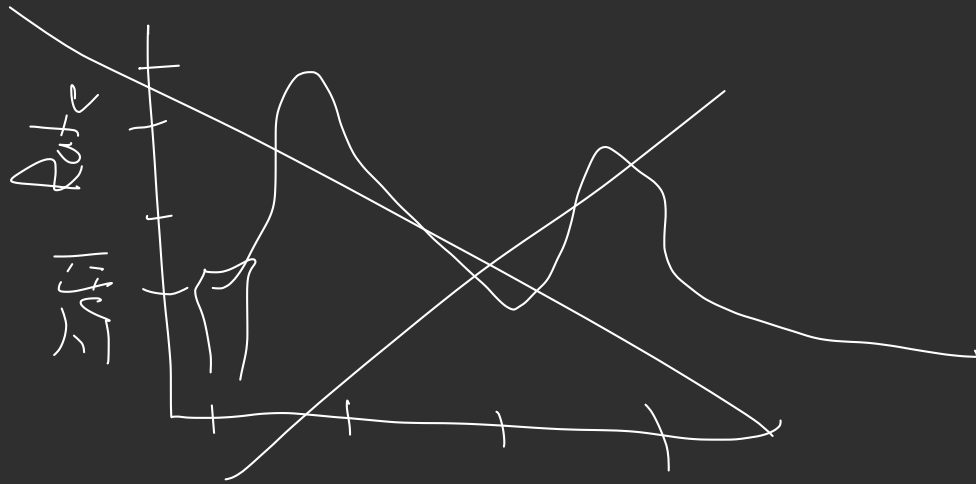

- Sampling location
